Operational Module Terms · Acceptance

Important Notice and Key Points

This section is a plain-language summary to help you. The full Terms that follow are what bind you, and if anything here differs, the full Terms prevail.

- Vaididea is a technology platform. Doctors, hospitals, pharmacies, labs, ambulance operators, gyms and other Providers are independent and responsible for their own services.
- Nothing on the Platform is medical advice. AI Features give general information only and can be wrong. Always check with a qualified doctor.
- In an emergency, call 112 or go to the nearest hospital. The SOS button helps find an ambulance but cannot guarantee that one will arrive.
- Your health data remains yours. It is shared with a Provider only with your consent (or in an emergency, or where law requires). You can see who viewed it, correct it, withdraw consent and ask for deletion, subject to legal record-keeping.
- You can get help in your language, and a Sahayak can help you use the Platform, but only with your consent.

- Fees, taxes and refund rules are shown before you pay. Your rights under consumer law stay in force.
- To complain, write to the Grievance Officer in Article XVIII. You will get an acknowledgement in 24 hours and a resolution in 15 days. You can also go to a Consumer Commission or the Data Protection Board of India.

Who should read what

If you are	Read these parts
Patient or Guardian	Articles I to IV, Article V Parts A, I, J and M, Articles VI, VII, XII, XVII and XVIII
Doctor, hospital or clinic	Article V Parts B, C, G, H, K, L, M and N, Articles VII, XIV and XV, Schedule A (A.1 to A.12, A.16 to A.22)
Pharmacy or diagnostic centre	Article V Parts D, E, K, L, M and N, Article VII, Schedule A (A.8 to A.10, A.20)
Ambulance operator or driver	Article V Part F, Article VII (clauses 7.14 and 7.15), Schedule A (A.4, A.13, A.21)
Gym, studio or wellness provider	Article V Part I (clauses 5.38 to 5.46) and Parts K and L, Schedule A (A.14)
Sahayak, delivery or sample-collection agent	Article V Parts J and N, Article VII, Schedule A (A.15, A.20)

Article I. Recitals and Acceptance

Whereas Vaididea Healthcare Private Limited (“Vaididea”, “Company”, “we” or “us”) operates a multi-sided digital platform under the brand Vaididea at www.vaididea.in and through associated mobile applications (including the Patient Application, the Ambulance Application and the Delivery Application) and Provider portals (together, the “Platform”), through which independent, licensed healthcare providers and allied service providers (“Providers”) may be discovered, engaged and coordinated with by members of the public seeking healthcare-related information and services (“Patients”);

And whereas the person or entity using the Platform in any capacity (“User”, “you” or “your”) wishes to use the Platform on the terms below; now, therefore, in consideration of the mutual covenants in this Agreement and the User’s access to and use of the Platform, the receipt and sufficiency of which the parties acknowledge, the parties agree as follows.

1.1 You accept these Terms and Conditions (“Terms”), the Privacy Policy and any role-specific agreement referred to in them (together, the “Agreement”) by ticking “I Agree”, completing registration, or using the Platform after notice of these Terms, in any capacity, including as a Patient, Doctor, Hospital, Clinic, Pharmacy, Diagnostic Centre, Ambulance Operator, Wellness or Gym Provider, Sahayak or Guardian. Browsing public pages alone does not bind you, but if you do not agree you must not register or use the Platform.

1.2 Where a User accepts for an organisation, that person confirms they have authority to bind it, and “User” then includes the organisation and every individual using the Platform under its account.

1.3 This Agreement is an electronic contract under the Information Technology Act, 2000 and the Indian Contract Act, 1872, and needs no physical or digital signature. We keep a record of your acceptance, including the version, date and time.

1.4 Where the Platform shows these Terms or a summary in a regional language, that version is for convenience. If versions differ, the English version prevails, except where law requires otherwise for consumers.

1.5 A module or feature applies only from the date it goes live on the Platform. Terms for a module not yet live have no effect until it is launched and announced under Article XIX.

1.6 This Agreement works together with the following documents, each published on the Platform. If a role-specific agreement is more specific than these Terms for that User, it governs for that User on that subject.

Document	Applies to	Covers
Privacy Policy and Privacy Notice	All Users	What personal data is collected, why, how long it is kept, and your rights
Refund and Cancellation Policy	Patients, Providers	Platform-level refund facilitation
Provider Agreement	Doctors, hospitals, clinics, pharmacies, labs, gyms and wellness providers	Fees, payouts, standards, audit, data processing
Ambulance Operator Agreement	Ambulance operators and drivers	Duty rules, fares, documents, safety
Sahayak and Healthcare Agent Agreement	Community health workers and Healthcare Agents	Conduct, training, confidentiality, consent handling

Document	Applies to	Covers
Data Processing Agreement	Providers using Vaididea as processor	Instructions, security, breach, sub-processors

Article II. Definitions and Interpretation

2.1 In these Terms, unless the context requires otherwise:

Term	Meaning
Platform	The Vaididea website, mobile applications (including the Patient Application, the Ambulance Application and the Delivery Application), Provider portals, application programming interfaces and all connected services operated by Vaididea.
Services	All functions and features made available through the Platform.
User	Any person or entity that uses the Platform, including Patients, Providers, Guardians and Sahayaks.
Patient	An individual who uses the Platform to seek, book, receive or manage healthcare-related information or services.
Provider	Any Hospital, Clinic, Doctor, Pharmacy, Diagnostic Centre, Ambulance Operator, Blood Bank, Wellness Centre, Gym, Studio, Trainer, Dietitian, home-care agency or other professional registered on the Platform to offer services.
Guardian	A User granted delegated, consent-based access to another User's profile and Health Data under the family/guardian module, including for a minor or dependent.

Term	Meaning
Sahayak	A community health worker (including an ASHA worker, once that integration is live), a Healthcare Agent or another assistant who helps a Patient use the Platform under Article V, Part J.
Health Data	Information about a User's physical, mental or reproductive health, medical history, prescriptions, laboratory results, vital signs, allergies, fitness and diet data, or biometric identifiers, which Vaididea treats as sensitive and protects with enhanced safeguards, whether or not the law classes it as a special category.
Digital Health ID	The User's unified profile on the Platform comprising identity, insurance, payment and medical-record information, shown in the Applications as the Health Card with a QR code.
ABHA	The Ayushman Bharat Health Account number or address issued under the Ayushman Bharat Digital Mission.
AI Features	Any artificial-intelligence or machine-learning functionality, including the AI Symptom Checker, Disease Prediction module, AI Food and Diet Tracker, camera-based vitals estimation, other computer-vision tools and the Vaididea AI assistant.
Emergency Services	The ambulance-dispatch, triage and emergency-alert functionality of the Platform, also called SOS.
Health Wallet	Any in-app feature that shows or holds a balance, credit or points for use on the Platform, as described in clause 5.67.
RMP	A Registered Medical Practitioner registered with the National Medical Commission or a State Medical Council.

Term	Meaning
Data Fiduciary, Data Processor, Data Principal, Consent Manager	Have the meanings in the DPDP Act, 2023 and the DPDP Rules, 2025. In this Agreement the Data Principal is the User whose personal data is processed.
Intermediary Guidelines Rules	The Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, as amended.
Privacy Policy	Vaididea's policy, published on the Platform, on how it collects, uses, shares, keeps and protects personal data.
Applicable Law	All Indian laws in force from time to time, including the Information Technology Act, 2000 and rules under it; the Digital Personal Data Protection Act, 2023 and DPDP Rules, 2025; the Indian Contract Act, 1872; the Consumer Protection Act, 2019 and Consumer Protection (E-Commerce) Rules, 2020; the Drugs and Cosmetics Act, 1940; the Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954; the Clinical Establishments (Registration and Regulation) Act, 2010 (where adopted by the State); the Medical Devices Rules, 2017; the Motor Vehicles Act, 1988; the Assisted Reproductive Technology (Regulation) Act, 2021; the Surrogacy (Regulation) Act, 2021; the Pre-Conception and Pre-Natal Diagnostic Techniques (Prohibition of Sex Selection) Act, 1994; the Medical Termination of Pregnancy Act, 1971; the Mental Healthcare Act, 2017; the HIV and AIDS (Prevention and Control) Act, 2017; the Rights of Persons with Disabilities Act, 2016; the Transplantation of Human Organs and Tissues Act, 1994; the Food Safety and Standards Act, 2006; the Payment and Settlement Systems Act, 2007; the Bharatiya Sakshya Adhiniyam, 2023; the Telemedicine Practice Guidelines, 2020 and National Medical Commission regulations; each as amended or replaced.

2.2 Headings are for convenience only. The singular includes the plural and each gender includes every gender. A reference to a law includes its amendments and replacements. “Including” means including without limitation.

Article III. Eligibility, Registration and Account Security

Eligibility

3.1 You must be at least eighteen (18) years old and competent to contract under the Indian Contract Act, 1872 to register on your own. A person under eighteen (18) may be added and managed only through a verified Guardian account, and the Guardian takes legal responsibility for that profile. A person with a disability who has a lawful guardian may be supported only as the law allows.

Provider onboarding

3.2 Every Provider must complete Vaididea’s onboarding and verification before being listed, including valid registration certificates, medical or professional licences, degrees, drug licences, vehicle and driver documents (for ambulance operators), trade and facility licences and insurance (for gyms and wellness providers), and other statutory approvals. Verification is a preliminary check only. Vaididea may verify further, reject, suspend or delist a Provider under Article XV.

Account accuracy and security

3.3 Each User must: (a) give accurate, current and complete information and update it promptly; (b) keep login credentials, one-time passwords and the Digital Health ID confidential and remain responsible for activity under the account; and (c) tell Vaididea immediately of any unauthorised access. Vaididea is not liable for loss arising from a User’s failure to protect credentials, except where the loss is caused by Vaididea’s failure to maintain reasonable security.

3.4 Each person may hold one account. Fake, duplicate or shared accounts may be closed after notice. An account inactive for a long period may be deactivated after notice, subject to the retention rules in Article VII.

3.5 You are responsible for a compatible device, internet or data connection and for installing required updates. Beta or pilot features are offered for testing, may change or stop without notice, and are used at your own risk, subject to clause 14.4.

Article IV. Nature of Services

Statement of role. Vaididea is a technology platform that connects Patients with independent, third-party Providers and offers tools for scheduling, records management, communication and information. Vaididea does not itself practise medicine, give medical advice, diagnose any condition, prescribe treatment, dispense medication, or operate any hospital, ambulance, laboratory or gym. All clinical, diagnostic, treatment, transport and fitness decisions are made exclusively by independent, licensed Providers.

4.1 No content on the Platform, including the Health Library, any AI Feature output or general wellness information, is medical advice or a substitute for a qualified physician. In a medical emergency, call 112 or the local emergency number or go to the nearest emergency care at once, and also use SOS if available. Relying on the Platform alone in an emergency is at the User's own risk.

4.2 Vaididea does not warrant the availability, accuracy, qualification, conduct or clinical outcome of any Provider. Verification at onboarding is a preliminary check, not an endorsement of competence, and creates no employment, agency or partnership between Vaididea and any Provider.

Intermediary status

4.3 For information, records, listings and services supplied by Providers and Users, Vaididea acts as an "intermediary" under Section 2(1)(w) of the Information Technology Act, 2000. In that role, and to the extent Section 79 of that Act protects it on the facts, Vaididea does not initiate the transmission of any clinical communication, prescription or record, does not select the receiver except as directed by the sending User, and does not select or modify the clinical information transmitted (Section 79(2) of that Act). It follows the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, as amended. Safe-harbour protection does not apply to functions Vaididea performs itself, such as ambulance-dispatch matching, the AI Features and payment facilitation, for which clause 4.4 applies.

4.4 Vaididea is directly responsible for its own functions, namely the accuracy of its software as designed, the security of the Platform, the AI Features, dispatch and queue logic, payment facilitation and the arithmetic of billing aggregation, in the manner stated in these Terms and Applicable Law. Nothing in clause 4.3 limits that responsibility.

4.5 Where the Consumer Protection (E-Commerce) Rules, 2020 apply, Vaididea also acts as a marketplace e-commerce entity and complies with them. Vaididea's role across every module of the Platform (appointment booking, OPD queuing, bed management, emergency dispatch, admission and discharge, nursing records, laboratory reporting, pharmacy fulfilment, delivery and home sample collection, billing aggregation and inter-

facility referral) is limited to software, connectivity and data infrastructure through which independent, licensed Providers render services directly to Patients. This position is set out module by module in Schedule A.

4.6 **How the Platform describes itself.** Statements in the Applications, on the website or in promotional material, such as “verified”, “instant”, “live” or “nearby”, describe how a feature is designed to work. They are not a guarantee of availability, response time, accuracy or outcome. Nothing in this clause limits any right you have under the Consumer Protection Act, 2019.

Article V. Role-Specific Terms

Part A. Patients

5.1 Patients use the Platform to find Providers, book appointments, access their Digital Health ID and records, request Emergency Services and use AI Features, subject to these Terms.

5.2 A Patient is responsible for the accuracy of the health information they give, including allergies, history and vital signs. Wrong input can affect AI output and emergency triage.

5.3 Booking an appointment or consultation creates a direct Provider-Patient relationship. Vaididea is not a party to it and assumes no responsibility for that clinical relationship.

Part B. Hospitals, Clinics and Doctors

5.4 Each such Provider is solely and independently responsible for the accuracy of what it publishes, the clinical care it gives, valid licences and registrations, and compliance with National Medical Commission regulations, the Clinical Establishments Act (where applicable) and all other law governing its practice.

5.5 A Provider given access to historical or sensitive records through the consent-request workflow must use them only for the purpose for which consent was given and in line with medical confidentiality.

5.6 A Hospital is responsible for the accuracy of real-time data it publishes (bed availability, wait times, department status) and for staff sub-accounts under its organisational account, and must restrict role-based access appropriately.

5.7 A Hospital alone decides, and bears sole responsibility for, billing, insurance-claim and refund decisions made through the billing module. Vaididea only provides software that aggregates charges from inputs entered by the Hospital’s staff.

5.8 Every Doctor, Hospital, Clinic and Diagnostic Centre must hold, to the extent the law or the Provider Agreement requires for its category and scale of practice, active professional indemnity or medical malpractice insurance with adequate limits for its scale of practice and show evidence on request. Vaididea may suspend a Provider who does not.

Part C. Teleconsultation

5.9 For consultations through the Platform, the RMP must comply fully with the Telemedicine Practice Guidelines, 2020 and any rules that amend or replace them, including patient identification, informed consent, the mode and limits of remote consultation, and referral for in-person care when needed.

5.10 Every digital prescription must carry, at minimum, the RMP's name, qualification and State Medical Council or National Medical Commission registration number, the patient's identification details, the date of consultation, and the RMP's digital signature or equivalent authentication.

5.11 An RMP shall not prescribe, and the Platform shall not be used to prescribe or dispense, any drug in Schedule X to the Drugs and Cosmetics Rules, 1945 or any narcotic, psychotropic or habit-forming substance restricted by the Telemedicine Practice Guidelines, except strictly as those Guidelines permit.

5.12 Only an RMP may diagnose or prescribe. AI Feature output is never a consultation, and an AI Feature may not act as an RMP. The RMP must advise emergency or in-person care where the condition needs it and must not continue remote care where the Guidelines require an in-person visit.

Part D. Pharmacies

5.13 A Pharmacy is solely responsible for prescription verification, dispensing accuracy, drug quality, stock authenticity, expiry management and compliance with the Drugs and Cosmetics Act, 1940, the Pharmacy Practice Regulations and applicable guidance on electronic pharmacies.

5.14 The Platform shall not be used to sell, dispense or deliver Schedule X drugs, unapproved or experimental formulations, or controlled narcotic or psychotropic substances. Vaididea acts only as a communication and logistics channel between Patient and fulfilling Pharmacy. The statutory duty to verify the original prescription (physical or valid electronic) and to refuse any non-compliant order lies entirely with the licensed pharmacist at the fulfilling outlet.

5.15 Inventory, dispatch, barcode-scanning, billing and automatic reorder tools (including first-expiry-first-out logic and purchase orders raised to a wholesaler when stock falls below a set level) are technology aids only and do not shift any statutory dispensing responsibility from the licensed pharmacist. A Pharmacy remains responsible for buying only from licensed sources and for approving any purchase order.

5.16 Home delivery of medicines, where offered, remains subject to rules on cold chain, packaging and controlled substances, for which the Pharmacy or its delivery partner is responsible. If a State or Union authority restricts, suspends or conditions e-pharmacy delivery, regulatory compliance, licensing and any order cancellation rest with the Pharmacy, and Vaididea is not liable for losses from that regulatory action. Delivery times shown in the Application are estimates only.

Part E. Diagnostic Centres and Laboratories

5.17 A Diagnostic Centre is responsible for sample integrity, testing accuracy, timely reporting, and sign-off by a qualified pathologist or radiologist before any report is released to a Patient or Doctor through the Platform.

5.18 Critical-value alerts are automated notifications based on thresholds set by the Diagnostic Centre or Doctor. They are a workflow aid and do not replace the Centre's or Doctor's independent clinical judgment or duty to communicate critical results directly where medically warranted.

Part F. Ambulance Operators and Emergency Services (Ambulance Application)

5.19 **Emergency Services Disclaimer.** The SOS feature helps alert nearby available ambulances (independently operated or run by a Hospital) and shows an estimated arrival time from live location data. Actual arrival time, vehicle equipment, paramedic qualification and the quality of pre-hospital care are the sole responsibility of the ambulance operator. Vaididea neither owns, operates, nor staffs any ambulance and does not guarantee availability, response time or successful dispatch, including in case of network failure, GPS inaccuracy, driver unavailability, traffic or force majeure. In a life-threatening emergency Users should, wherever possible, also call local emergency numbers directly.

5.20 An Ambulance Operator is responsible for vehicle roadworthiness, equipment maintenance, paramedic certification and compliance with transport and emergency-medical-service law, including the Motor Vehicles Act, 1988, the applicable ambulance code (such as AIS-125) and State EMS rules.

5.21 **Status.** Operators and drivers using the Ambulance Application are independent of Vaididea (a Hospital's own fleet and drivers remain the Hospital's responsibility). They are not employees, agents or partners of Vaididea, and Vaididea does not own, insure or staff

any ambulance. Operators use the Application under a separate operator agreement.

5.22 **Documents.** Before activation, each operator must provide vehicle registration, fitness certificate, permit, valid motor insurance, driver licence with ambulance endorsement where required, and State EMS or ambulance registration, and must keep them current. Expired documents lead to automatic deactivation.

5.23 **Duty conduct.** After accepting a call the operator must respond without delay, keep GPS and mobile data on, not refuse an emergency patient over a payment dispute, and take the patient to the nearest suitable facility or the one the patient or Provider directs, as medically appropriate.

5.24 **Fares.** Fares must follow the rate card shown in the Application and any State-fixed cap. No extra charge may be demanded. Fare disputes go to the Grievance Officer.

5.25 **Location and call data.** The Application collects an operator's location only while on duty or on an active job, and may record calls and trip logs for safety, quality and dispute handling, as the Privacy Policy states. Patient data shown to operators is limited to what the trip needs.

5.26 **Misuse.** False acceptances, fake trips, GPS spoofing, taking jobs off the Platform to avoid fees, or harassing patients lead to suspension or delisting under Article XV.

5.27 **Bystanders.** Anyone may raise an SOS for another person. A rescuer is protected as the Good Samaritan provisions of the Motor Vehicles Act allow, and no one is required to pay or give personal details before help is dispatched.

5.28 **Dispatch limits.** Dispatch alerts nearby available operators in rounds of widening distance, and the first operator to accept receives the request. If no operator accepts, the Application tells you and suggests calling 108 or 112. Dispatch may fail or be delayed by network, GPS, traffic, operator availability or force majeure. Estimated arrival time is indicative only.

5.28A **Hospital fleets.** A Hospital may register its own ambulances and drivers, manage them and see their live location through the Hospital portal, and may raise or receive an SOS directly ("Direct Hospital SOS"). For that fleet the Hospital is the Ambulance Operator and carries the responsibilities in clauses 5.20 to 5.26, including for its drivers. Vaididea provides the tools only.

5.28B **Automatic crash detection.** Where you switch on crash detection, the Application uses your phone's motion sensors (accelerometer and gyroscope) to look for a possible serious crash. If it detects one, it starts a short countdown with an alarm (currently ten (10) seconds) and sends an SOS automatically unless you cancel. It runs only with your consent and the device permissions you give, and you can switch it off at any time. It may

raise false alarms or miss a real crash, depending on your device, battery, settings and network, and it is not a substitute for calling for help yourself. An automatic SOS you did not mean to send is not misuse under clause 11.1 if you cancel it or tell us promptly.

5.28C **Alerts during an SOS.** While an SOS is active, the Application may alert nearby available ambulances, nearby hospitals, nearby Doctors, your Guardians and your emergency contacts, and may share status updates, your live location and the medical information you chose to include with them, as clause 7.14 provides.

Part G. Blood Bank Module

5.29 Blood-stock and donor-matching information is self-reported by the Hospital or Blood Bank and by registered donors and is provided for information and coordination only.

5.30 Vaididea does not collect, store, test or transfuse blood. Screening, testing, cross-matching and safe transfusion remain the sole responsibility of the licensed Blood Bank or Hospital under the Drugs and Cosmetics Act and National Blood Transfusion Council guidance.

5.31 No money, incentive, fee or commercial trade may be facilitated through the Platform between a blood donor and a recipient or their representative, consistent with the National Blood Policy, directions of the Supreme Court of India and the Drugs and Cosmetics Rules, 1945. A Provider found doing so is liable to immediate delisting.

Part H. Fertility, IVF and Women's Health Services

5.32 Fertility, IVF and women's-health modules involve highly sensitive reproductive Health Data. Access is restricted, encrypted and governed by enhanced consent controls described in the Privacy Policy.

5.33 All fertility treatment, embryo-related procedures and clinical decisions are the sole responsibility of the treating, independently licensed clinic or specialist and must comply with the ART (Regulation) Act, 2021 and the Surrogacy (Regulation) Act, 2021 as applicable. The Platform provides record-keeping, scheduling and progress-tracking tools only.

Part I. Home Nursing, Elder and Post-Operative Care; Insurance, Payments and Health Wallet; Wellness and Gym

5.34 Home-care, nursing, physiotherapy and post-surgical care are provided by independent agencies or professionals. Except to the extent caused by Vaididea's own negligence or a defect in the Platform, as clause 14.4 provides, Vaididea is not responsible for the quality of in-home care or incidents at a User's residence.

5.35 Vaididea may display insurance eligibility, cashless-claim status and Health Wallet payments through integration with insurers, payment aggregators and Provider billing systems as a facilitator only. Approval, rejection or amount of any claim (including under government schemes) is decided solely by the insurer or scheme administrator.

5.36 Where the Platform collects fees from a Patient and passes them to a Provider, collection, holding and remittance are done only through a Payment Aggregator authorised by the Reserve Bank of India (which may be a third-party partner) and a designated nodal or escrow account, or through a payment gateway that settles directly to the Provider, under the RBI's guidelines on payment aggregators and payment gateways as amended. Vaididea does not hold Patient funds outside that arrangement.

5.37 Vaididea does not store full payment-card or bank-account credentials. Payments are processed through PCI-DSS-compliant third-party gateways.

5.38 **Wellness and gym status.** Gyms, studios, yoga centres, trainers, dietitians and wellness providers are independent Providers. Vaididea provides listing, booking and payment tools only and does not train, advise or supervise users.

5.39 **Provider duties.** Each such Provider is solely responsible for facility safety (fire, structure, equipment, first aid, trained staff), trade and local licences, insurance including public liability, trainer qualification and conduct, hygiene, and the suitability of any programme for the user.

5.40 **Health declaration.** Before starting a programme the user must give an accurate health declaration (such as a PAR-Q) and obtain medical clearance if they have a medical condition, are pregnant, are recovering from illness or surgery, or fall in an age band the Provider specifies. A user who gives false information carries the resulting risk.

5.41 **Minors.** A person under eighteen (18) may join only through a Guardian account with the Guardian's consent and only for age-appropriate activities.

5.42 **Claims and advertising.** Providers must not claim to cure, treat or prevent any disease or promise guaranteed results, and must follow the Consumer Protection Act, 2019, the Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954 and applicable advertising guidelines. Diet and nutrition advice may be given only by suitably qualified persons. Supplements and food products listed must comply with FSSAI rules.

5.43 **Memberships and passes.** Price, validity, freeze, transfer, cancellation and refund rules are set by the Provider and shown before purchase. They must be fair, and a refund is due if the Provider closes, cancels or materially changes the service.

5.44 **Assumption of risk.** Exercise carries physical risk. A user accepts the ordinary risks of fitness activity, but this does not waive claims against a Provider or Vaididea for gross negligence, unsafe premises or equipment, or any right that cannot legally be waived.

5.45 **Safety and conduct.** Harassment, discrimination or inappropriate conduct by a trainer or user should be reported to the Grievance Officer. Vaididea may suspend the Provider or user while it looks into the matter.

5.46 **Fitness and diet data.** Data from wearables and phone sensors (including data you connect through Health Connect or similar services), step counters, diet logs and workouts is Health Data under Article VII. The AI Food and Diet Tracker and any AI workout suggestions are general wellness tools, not medical nutrition therapy, and are not suitable alone for pregnancy, chronic illness, eating disorders or children. Users in those situations should consult a qualified professional. Wearable and sensor readings may be inaccurate and are not diagnostic.

5.46A **Camera-based vitals.** The Application may estimate your pulse, breathing rate, heart-rate variability or stress level and, as an experimental feature, your blood-oxygen level, using your phone's camera and light. The reading is worked out on your device and leaves it only when you choose to save or share it. These readings are estimates. Lighting, movement, skin tone, device quality and other things can make them wrong, and they are not a substitute for a medical-grade device or an examination. Any alert the Application shows when a reading is outside a general range is a prompt to speak to a qualified Doctor. It is not a diagnosis, and you should seek care if you feel unwell whatever a reading says.

Part J. Assisted Access (Sahayak)

5.47 A Patient may allow a Sahayak to help register, book, record vitals or join a consultation. The Patient's informed consent (OTP, voice, or thumb or biometric confirmation as the Platform offers) is required, and the Sahayak must explain in the Patient's language what is being done.

5.48 A Sahayak is an independent worker or partner under a separate agreement, not a Vaididea doctor or employee unless stated. A Sahayak may use only the access the Patient grants and must not keep or share Health Data.

5.49 On shared devices the user must log out after use, and the Platform may expire sessions on shared devices.

5.50 Consent given by assisted, voice or low-literacy methods is valid if the Platform's record shows it was given. The Patient may withdraw it at any time.

Part K. Provider commercial terms

5.51 Provider fees are charged as a technology and service fee and are not payment for referrals or for steering patients, consistent with National Medical Commission ethics rules. Payouts are made through the nodal or escrow account net of disclosed fees and

applicable taxes, including GST and tax collected at source where applicable.

5.52 Providers must not advertise in violation of National Medical Commission rules, the Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954 or consumer-protection law.

Part L. Additional Provider compliance

5.53 **Sex determination.** The Platform shall never be used for pre-conception or pre-natal sex determination or selection. Every diagnostic, imaging or fertility Provider must comply with the Pre-Conception and Pre-Natal Diagnostic Techniques (Prohibition of Sex Selection) Act, 1994, hold any registration it requires, and not advertise such services. Breach leads to immediate delisting and reporting to the authorities.

5.54 Termination of pregnancy services may be listed only by Providers registered and authorised under the Medical Termination of Pregnancy Act, 1971, and remain solely that Provider's responsibility.

5.55 **No inducements.** No Provider may give or take any commission, gift, hospitality or other inducement for referring or steering patients, in line with National Medical Commission rules. Any such practice leads to delisting.

5.56 **Provider data duties.** A Provider that is a Data Fiduciary for its patients' records must obtain valid consent, keep reasonable security safeguards, honour Data Principal requests, sign the Data Processing Agreement, tell Vaididea within twenty-four (24) hours of any breach affecting data on the Platform, and cooperate with the Data Protection Board and Vaididea in responding.

5.57 **Medical records.** A Provider must keep medical records and give a patient a copy as law and National Medical Commission rules require. Vaididea's digital copy does not replace the Provider's own duty.

5.58 **Cooperation.** A Provider must cooperate with patient-safety complaints, grievance enquiries and reasonable quality audits, and respond within the period in the Provider Agreement.

5.59 **Provider confirmations.** Each Provider confirms that its licences, registrations and insurance are valid and that no authority has barred it from practice, and must tell Vaididea at once if that changes.

5.60 **Listing and ranking.** Listing order depends on factors such as relevance, location, availability, ratings, reviews, experience and specialisation, and any placement the Provider has paid for. To personalise results, the Platform may also use your own profile (such as chronic conditions you have entered) and your past consultations on the Platform. In an emergency or urgent search, the nearest available Provider comes first.

Paid placements are clearly marked as sponsored. Vaididea does not promise any number of bookings, enquiries or appointments, and does not promise that every appointment request will be confirmed or honoured.

5.61 **Provider staff.** Each person using a Provider account must have their own login, and logins may not be shared. The Provider is responsible for all staff, associates and sub-accounts and for their compliance with this Agreement.

5.62 **Provider profile.** A Provider may update or remove its public profile through the Platform. Vaididea may keep a copy of profile information where law, a dispute or patient records require it.

5.62A **Payment-linked release and discharge.** A Diagnostic Centre or Hospital may set its billing tools to hold the release of a report, or a discharge clearance, until payment or insurer approval. That setting is the Provider's own decision and responsibility. It must not be used to delay emergency care, to hold back a critical result, to detain a Patient or a body, or to refuse a Patient access to their own record where the law gives that right. Clause 5.18 and a Patient's rights under Article VII are not affected.

5.62B **Splits, ledgers and payouts.** Tools that work out a split of a bill between a Doctor and a Clinic or Hospital, show earnings, record the clinician who referred a Patient or settle payouts only record and compute arrangements that the Providers have themselves agreed, and those arrangements must be lawful. They are not payment for referrals. No Provider may use them to pay, receive or track any commission, rebate or other inducement for referring or steering patients (see clause 5.55), and Vaididea may suspend a Provider who does.

5.62C **Provider-set rates and packages.** Price lists, test and care packages, corporate or government-scheme rate lists, advance-deposit thresholds and insurer pre-authorisation amounts are set by the Provider. The Provider is responsible for their accuracy and legality and for a Patient's eligibility, and Vaididea is responsible only for the arithmetic, as clause 4.4 provides.

Part M. Additional Patient and Platform terms

5.63 **Recording.** No one may record, screenshot or share the audio or video of a teleconsultation without the express consent of every participant. Any recording the Platform itself makes is made only with that consent, kept as the Privacy Policy states, and treated as Health Data.

5.64 **Prescriptions.** A prescription issued through the Platform is for the named Patient and the stated condition only. A Patient must not alter, reuse or share it, or use it to obtain medicine for another person. Its validity and any refill are as the RMP states and the law allows.

5.65 **Mental health.** The Platform is not a crisis or suicide-prevention service. A person in distress, or at risk of harming themselves or others, should call 112 or the Tele-MANAS helpline (14416), or go to the nearest hospital. AI Features do not provide counselling or therapy. Mental-health information is Health Data and is protected as the Mental Healthcare Act, 2017 requires.

5.66 **Sensitive conditions and non-discrimination.** Providers must keep information about HIV status, mental illness, reproductive health and similar conditions confidential as the HIV and AIDS (Prevention and Control) Act, 2017, the Mental Healthcare Act, 2017 and other law require. A Provider must not refuse emergency care, and must not discriminate against any Patient on grounds of sex, gender identity, caste, religion, disability, HIV status or any other ground the law prohibits.

5.67 **Health Wallet and stored value.** The Health Wallet lets you see a balance, add money, pay Providers through quick pay and, where a subsidy or scheme applies, have part of a bill met from it. A bill may be split between cash or UPI, your wallet and an insurance claim, and any subsidy applies only as the terms of whoever funds it state. Where the Platform offers a Health Wallet that holds money, it will be offered only after the authorisations, arrangements and approvals the law requires for that feature are in place, and it applies only from its go-live date under clause 1.5. Where an authorised issuer or other regulated entity operates it, that entity's terms also apply. Vaididea does not accept stored value except where it is authorised to do so. Promotional credits, cashback and points have no cash value, cannot be transferred, may expire as shown when they are given, and may be reversed if obtained through misuse.

5.68 **Offers, coupons and referrals.** The terms of an offer are shown with it. Vaididea may change or withdraw an offer for the future. Multiple accounts, fake referrals or other abuse lead to reversal of the benefit and may lead to suspension under Article XV. No Provider may use an offer to induce unnecessary tests, procedures or purchases.

5.69 **Provider cancellation.** If a Provider cancels, materially reschedules or does not attend a confirmed booking, the Patient is entitled to a full refund of what was paid for it, and Vaididea will help to rebook where possible. Repeated failures may lead to action under Article XV.

5.70 **Patient–Provider disputes.** Vaididea is not a party to a dispute between a Patient and a Provider and does not decide clinical fault, but it may help the parties communicate. A Patient may complain about a Provider's clinical conduct to the State Medical Council, the National Medical Commission or another competent authority, or approach a Consumer Commission or court. Vaididea will cooperate with any lawful inquiry.

5.71 **Patient-safety reports.** Users and Providers should report adverse events, medication errors and safety concerns through the Application or to the Grievance Officer. Vaididea may share a report with the Provider concerned, and with a competent

authority where law requires or patient safety demands.

5.72 **Mobile applications.** Vaididea gives you a limited, personal, non-transferable, revocable licence to install and use the Applications for their intended purpose. Features may ask for permission to use your location, camera, microphone, contacts, storage or notifications. You can change these permissions in your device settings, but some features (such as SOS and nearby search) may not work without them. Apple, Google and other app stores are not parties to these Terms and have no duty to support the Applications.

Part N. Delivery and Healthcare Agents

5.73 **Status.** A delivery agent, sample-collection agent or other healthcare agent who uses the Delivery Application (a "Healthcare Agent") acts for the Pharmacy, Diagnostic Centre, Hospital or other Provider that added or engaged them, or independently under a separate agreement. A Healthcare Agent is not an employee, agent or partner of Vaididea. The Provider that adds or assigns a Healthcare Agent is responsible for verifying and training them, for their conduct, for the areas and routes they cover and for incentives and settlements. Vaididea provides the assignment, tracking and status tools only.

5.74 **Medicine delivery.** A delivery agent hands medicines only to the Patient or a person the Patient has authorised, in line with clause 5.16 and the handover steps in the Application. Delivery times shown are estimates.

5.75 **Sample collection.** Home sample collection is done only by trained persons engaged by the Diagnostic Centre. The collector must get the Patient's consent before taking a sample, label and track it as the Application's steps require, and keep and transport it as the Diagnostic Centre's protocol requires. Sample integrity and testing remain the Diagnostic Centre's responsibility under clause 5.17 from the moment of collection. A Patient or agent who feels unsafe may end a home visit.

5.76 **Conduct and data.** A Healthcare Agent must not give medical advice, must use only the Patient information needed for the task, and must not keep or share it afterwards. The Application shares an agent's live location with the Patient and the Provider only while a task is active. Harassment of or by an agent should be reported to the Grievance Officer, and Vaididea may suspend the agent or the Patient while it looks into the matter.

5.77 **Cash and payments.** Where an agent collects cash or a fee, the Provider that assigned the task is responsible for it, for giving the Patient a receipt and for settlement. Vaididea's records of cash collection are made from entries by the Provider and its agents.

5.78 **Helping a Patient use the Platform.** When a Healthcare Agent helps a Patient to register, book or use a service, the agent acts as a Sahayak and Part J applies, including the Patient's consent.

Article VI. Artificial Intelligence Features

AI Disclaimer. The AI Features use machine-learning models to give general, probabilistic, informational guidance from the data made available to them. They are decision-support and information tools only; they are intended as decision-support and information tools and, where any feature is a medical device under Applicable Law, it is licensed and labelled as such; they do not diagnose or treat; and they may produce incomplete, outdated or incorrect output, including in some regional languages or dialects.

6.1 The AI Features are non-diagnostic, probabilistic decision-support tools. They are not a "Medical Device" under the Medical Devices Rules, 2017 or Central Drugs Standard Control Organisation guidance for so long as they are designed and described for that non-diagnostic purpose. Where a feature is or becomes a medical device, Vaididea obtains the licence the law requires and labels the feature as such. No AI Feature replaces registered diagnostic software, a Medical Device, or the independent clinical judgment of a qualified Doctor.

6.2 A User must not rely on AI output instead of professional consultation and must verify AI guidance with a qualified Doctor before acting on it. For emergency symptoms, follow clause 4.1.

6.3 Where AI assists a Provider, the RMP remains solely responsible for clinical decisions.

6.4 To the fullest extent Applicable Law permits, Vaididea is not liable for harm from a User's decision to act or not act in sole reliance on AI output. This does not limit liability under clause 14.4.

6.5 AI models are trained or improved only with de-identified or aggregated data and only with your specific, separate opt-in consent. You may withdraw that consent at any time without losing the Services.

6.6 Vaididea tests AI Features for safety and bias, keeps logs and reviews reports of serious errors.

6.7 Voice navigation, speech recognition and translation features may mishear or mistranslate, especially with accents or dialects. Before acting on important information (medicine names, doses, appointment details), confirm it with the Provider or a Sahayak.

6.8 AI-generated text, images or summaries that Vaididea shows you are labelled as AI-generated where the Platform can do so. You must not use AI Features to create false medical records, forged prescriptions or misleading health content.

6.9 **Research and validation.** If you have given the separate opt-in in clause 6.5, Vaididea may also use de-identified or aggregated data to test and validate AI Features and for health research and public-health work with academic, medical-college, non-

governmental and government partners, under written terms that forbid re-identification and misuse. Vaididea does not use data for these purposes without that opt-in, except for the outbreak monitoring described in Article VIII.

6.10 **Third-party AI providers.** To answer a request, an AI Feature may send the text, image or health context needed for that request (for example, your question, a meal photo or recent vitals) from Vaididea's servers to a third-party AI model provider, some of which may process it outside India. Your device does not send this data to those providers directly. Vaididea limits what is sent to what the request needs and chooses such providers under written terms, as clause 7.16 provides. Any cross-border processing follows clause 7.12.

Article VII. Medical Records, Health Data and Consent

Ownership and roles

7.1 Nothing in these Terms transfers ownership of a User's personal records or uploaded content to Vaididea. Users keep the rights available to them under Applicable Law in relation to their personal data and Health Data. Vaididea may process such data only as described in the Privacy Policy, these Terms and Applicable Law.

7.2 For the Digital Personal Data Protection Act, 2023 ("DPDP Act"), roles depend on who in fact decides the purposes and means of processing. In the ordinary case they are as follows. Where Vaididea and a Provider jointly decide purposes, they act as joint Data Fiduciaries and each meets its own obligations.

Data	Vaididea's role	Provider's role
Account, app usage, Vaididea's own service operation, safety and outbreak analytics, AI improvement (with consent)	Data Fiduciary	Not applicable
Clinical records held in a Provider's electronic record system hosted or managed through the Platform	Data Processor, on the Provider's documented instructions under a Data Processing Agreement	Data Fiduciary, with the statutory duties of a Data Fiduciary

Where Vaididea acts as Data Processor on a Provider's instructions, as between Vaididea and the Provider, the Provider bears the Data Fiduciary's statutory obligations under the DPDP Act for that data. Vaididea's obligation is limited to processing strictly in line with the Provider's lawful instructions and its agreement with that Provider.

Consent-based access

7.3 Health Data is disclosed to a Provider only where the User has granted access (directly, by showing the Digital Health ID or QR code at a facility, or through an in-app consent request for historical or sensitive records), or where law requires, or where needed to preserve life in an emergency.

7.4 Every time a Provider views a historical or sensitive record it is logged, showing who accessed it and when, and the log is available to the User on request.

7.5 A Guardian's access to a dependant's or minor's records is only to manage that person's care and is subject to audit.

Your rights

7.6 You may access, correct, update and erase your data, withdraw consent, nominate another person to exercise your rights in case of death or incapacity, and complain to the Grievance Officer and the Data Protection Board of India. Our privacy notice is available in English and in each Eighth Schedule language we support.

7.7 You may withdraw consent at any time through the Platform, as easily as it was given (Section 6(4), DPDP Act). Withdrawal works going forward only. It does not affect processing already done, or any clinical transaction, prescription, billing record or statutory record already completed. A User withdrawing consent mid-treatment should know that some records may be kept as clause 7.11 provides.

Children and persons with disabilities

7.8 Before processing the data of a child (under eighteen) or of a person with a disability who has a lawful guardian, Vaididea obtains verifiable consent from the parent or lawful guardian through the Guardian linking and verification mechanism on the Platform, as Section 9 of the DPDP Act and the DPDP Rules, 2025 require, except where those Rules exempt the processing (for example, certain health-service processing by a clinical establishment or healthcare professional, which remains that Provider's responsibility). Vaididea does not track or monitor a child's behaviour or direct targeted advertising at a child, except as the Act and Rules allow.

Security, breach, retention and transfers

7.9 Vaididea uses reasonable security safeguards, including encryption, role-based access, audit logs and backups.

7.10 On a personal data breach affecting Health Data, Vaididea acts as the DPDP Act and Rules, as they apply to it from time to time, require and, until the relevant provisions are in force, follows the same standard as a matter of practice. It contains and remedies it, informs each affected person without delay, informs the Data Protection Board of India

without delay, files a detailed report within seventy-two (72) hours (or any extended period the Board allows), once Rule 7 of those Rules applies, and complies with directions of the Indian Computer Emergency Response Team.

7.11 Vaididea keeps data only as long as the purpose needs or law requires. Clinical records, including discharge summaries and statutory documents, are kept for at least the period prescribed by the clinical-establishment, medical-record and other laws that apply (which differs by type of record and by State), subject to each Provider's own obligations. After that, data is deleted or anonymised under the Privacy Policy, after any advance notice that law requires (for example, the notice the DPDP Rules, 2025 require, for specified classes of Data Fiduciary, before erasure for inactivity). A legal hold overrides deletion. Information that the Intermediary Guidelines Rules require Vaididea to keep (such as registration information for 180 days after an account is closed, and records of removed content for 180 days) is kept for that period and then deleted.

7.12 Health Data is stored on servers in India. Any cross-border transfer or processing, including the processing by third-party AI providers described in clause 6.10, happens only as the DPDP Act and Central Government notifications permit.

7.13 If you link an ABHA under the Ayushman Bharat Digital Mission, Vaididea processes related data under that Mission's health data management rules. You can unlink at any time.

Emergency sharing and legal disclosure

7.14 When you raise an SOS, your name, live location, contact number and any medical information you chose to include (for example blood group or allergies) are shared with the Vaididea dispatch team, the operators alerted and the operator who accepts, the receiving and nearby hospitals and Doctors so that they can prepare, your Guardians and your emergency contacts. This is processing to respond to a medical emergency and you agree to it. You can choose which medical information is included in your settings.

7.15 Vaididea may disclose data where a court, the Data Protection Board or another competent authority lawfully requires it. Unless the law forbids it, Vaididea will tell you before or soon after, and will share only what is required.

7.16 A Provider's duties as Data Fiduciary are in clause 5.56. Vaididea uses sub-processors only under written terms that give the same protection, and keeps a list available on request.

Additional data terms

7.17 Vaididea does not sell your Health Data and does not use it to show you third-party advertising.

7.18 The Digital Personal Data Protection Act, 2023 and the DPDP Rules, 2025 apply to Vaididea to the extent and from the dates on which their respective provisions come into force. Vaididea will comply with applicable legal requirements from their respective effective dates and may adopt additional safeguards before those dates. Nothing in these Terms excludes or limits any right or obligation that applies under Applicable Law.

7.19 Once the Consent Manager framework under the DPDP Rules, 2025 is in force, you may give, manage and withdraw consent through a registered Consent Manager, and Vaididea will honour consent signals received that way.

7.20 Vaididea does not try to re-identify data that has been de-identified or aggregated, and does not allow any recipient of such data to do so. De-identified or aggregated data is used only as Applicable Law, your consent and Vaididea's contracts permit.

7.21 The Platform may use cookies, device identifiers and similar tools as the Privacy Policy describes. Tools that are not strictly needed to run the Platform are used only with your consent.

7.22 You may make a request about your data, such as access, correction, erasure or withdrawal of consent, through the Application or to the Grievance Officer. Vaididea may verify your identity first and will respond within the period in Article XVIII.

Article VIII. Public Health and Outbreak Alerts

8.1 Where a Hospital or Diagnostic Centre reports an unusual cluster of a notifiable or contagious disease, the Platform may send localised, aggregated advisory alerts to Users within a defined radius, based on statistically aggregated and de-identified data. These are precautionary public-health advisories only, are not individual diagnoses, and never disclose the identity or health status of any identifiable person. Vaididea may share aggregated, de-identified outbreak signals with public-health authorities where law requires or permits.

8.2 In addition to reports from Providers, Vaididea's outbreak monitoring may use signals from how the Patient Application is used, namely text typed into the AI assistant or symptom analyser, reasons given when booking an appointment, diagnoses recorded by Doctors, SOS requests and data from connected wearables. Each signal is reduced to non-identifying fields (such as city, age band, gender and symptom or disease category) when it is collected, without your name, phone number or exact address. A diagnosis recorded by a Doctor is used for this only where the Provider has authorised it.

8.3 The Privacy Notice describes this use. You may withdraw your consent to it in your settings, as clause 7.7 provides. Vaididea does not publish or alert at a level of detail that could identify a person, and takes extra care with any result about a small group.

Article IX. Third-Party Integrations, Referrals and Interoperability

9.1 The Platform may integrate with third-party laboratories, pharmacies, insurers, payment gateways, wearables and government health-registry systems, including the Ayushman Bharat Digital Mission. Vaididea is not responsible for their availability, accuracy or security beyond its reasonable integration obligations.

9.2 An inter-hospital digital referral transfers the Patient's relevant records to the receiving facility only with the Patient's consent (or an emergency override) and the receiving facility's acceptance. Both facilities remain independently responsible for continuity and quality of care.

9.3 Hospital control-room analytics (occupancy data, incident logs, feedback ratings) are operational tools for the Provider's own quality and safety work and are not a representation by Vaididea about any Provider's overall quality of care.

Article X. Intellectual Property and User Content

10.1 The Platform, including software, source code, algorithms, AI models, trade marks (including "Vaididea" and its logos), design and Health Library content, is owned by or licensed to Vaididea and protected by Applicable Law and international conventions. Subject to a limited, revocable, non-exclusive licence to use the Platform for its intended purpose, no right, title or interest passes to any User or Provider.

10.2 A User or Provider keeps ownership of content it uploads (including medical records, prescriptions and clinic branding) and gives Vaididea a limited licence to host, process and display it solely to run the Services.

10.3 No User or Provider may copy, reverse-engineer, decompile, scrape or create derivative works from the Platform, except as Applicable Law permits.

10.4 Reviews and feedback must be truthful and lawful. Vaididea does not verify them but may remove content that breaches law or these Terms, or on valid notice, within the timelines set by the Intermediary Guidelines Rules.

10.5 Reviews of a Provider are the reviewer's own views and are not statements of Vaididea.

10.6 If you send suggestions or feedback about the Platform, you give Vaididea a free, perpetual licence to use them without any duty to you. This does not apply to your Health Data or personal data.

10.7 The Platform may link to third-party sites or services. Vaididea does not control them and is not responsible for them, and their own terms apply.

Article XI. Acceptable Use

11.1 A User shall not:

- impersonate any person, including by falsely claiming to be a licensed Doctor, Hospital, Pharmacy, Ambulance Operator or trainer;
- upload false medical credentials, forged prescriptions, fake vehicle or licence documents, or fraudulent insurance information;
- misuse the Emergency SOS feature for a non-emergency purpose;
- try to access another User's account, Health Data or the Guardian-consent workflow without authorisation;
- resell or redistribute the Services without Vaididea's prior written authorisation;
- introduce malware, attempt unauthorised access or otherwise compromise Platform security; or
- use the Platform for any unlawful purpose or against Applicable Law.

11.2 **Non-circumvention.** A Provider shall not move a booking that was arranged on the Platform off the Platform in order to avoid applicable fees, for twelve (12) months after the first booking with that Patient, to the extent this restriction is reasonable and enforceable under Applicable Law. This clause binds Providers only. It does not restrict a Patient's right to choose any Provider or to continue care with a Provider, and it does not apply to genuine emergencies, continuity of care or a Patient's existing, independent relationship with a Provider.

11.3 **Communications.** You agree Vaididea may send service messages (OTPs, reminders, alerts) by SMS, WhatsApp, calls, email and app notifications. Marketing messages need your separate opt-in and you may opt out at any time.

11.4 A breach of this Article may lead to suspension or termination under Article XV, without prejudice to any other remedy in law. Repeated breaches after a warning may lead to permanent removal, and the person may not register again without Vaididea's permission.

11.5 **Prohibited content.** No User shall host, display, upload, modify, publish, transmit, store, update or share information that: (a) belongs to another person and which the User has no right to share; (b) is defamatory, obscene, pornographic, paedophilic, invasive of another's privacy, hateful, or racially or ethnically objectionable, or promotes gambling or money laundering; (c) harms minors in any way; (d) infringes any patent, trade mark, copyright or other proprietary right; (e) violates any law in force; (f) deceives or misleads about its origin, or is grossly offensive or menacing; (g) impersonates another person; (h) contains malware or any code designed to interrupt or limit a computer resource; (i) is false or misleading medical or health information, including fake cures, forged records or false reviews; (j) threatens the unity, integrity, defence, security or sovereignty of India,

public order or friendly relations with other states; or (k) is synthetically generated or manipulated content, including a deepfake, that is deceptive or that depicts a real person without their consent.

11.6 **Takedown and records.** If Vaididea learns of such content, or receives a court order or a reasoned notification from the appropriate Government or its authorised agency, it will remove or disable access within three (3) hours of receiving that order or notification, or within any other period the Intermediary Guidelines Rules prescribe from time to time. A complaint about non-consensual intimate or morphed content will be acted on within two (2) hours. A complaint about other prohibited content will be dealt with within the period the Intermediary Guidelines Rules prescribe (currently thirty-six (36) hours for specified categories). Vaididea keeps records of removed content and of registration information for one hundred and eighty (180) days, or longer if a court or authority requires.

11.7 **Annual reminder.** At least once a year, Vaididea will remind Users of these Terms, the Privacy Policy and any changes, and that non-compliance entitles Vaididea to end their access and remove non-compliant information.

11.8 **Competitors and spam.** Without Vaididea's written consent, no one may use the Platform to benchmark it, to build or improve a competing product, or through automated tools such as bots or scrapers. Providers must not send unsolicited commercial messages to Patients or other Users and must follow TRAI rules and the DPDP Act on communications.

11.9 **Responsible disclosure.** If you find a security weakness in the Platform, report it in good faith to the Grievance Officer at the address in Article XVIII and give Vaididea reasonable time to fix it before you disclose it. Do not access, change or keep other people's data. Vaididea will not take legal action against research done in good faith within these limits.

11.10 **Organs, certificates and unlawful services.** The Platform shall not be used to arrange the sale or purchase of any human organ or tissue, to issue a medical, fitness or sick certificate or report without a proper examination, or to offer any service that the law prohibits.

11.11 **Respect for Providers and staff.** A User shall not abuse, threaten, harass or assault any Provider, Sahayak, driver, medical or other staff member met through the Platform. Vaididea may suspend or remove a User who does so.

11.12 **No bribery.** No User shall offer, give, ask for or accept any bribe or improper payment in connection with the Platform, including to a public official or to Vaididea's staff.

Article XII. Fees, Subscriptions, Billing and Refunds

12.1 Certain Services, including Provider subscriptions, premium Patient features, and platform or convenience fees on transactions, are chargeable as shown on the Platform at purchase, inclusive of applicable GST.

12.2 Consultation, procedure, room, pharmacy, membership, care-package, home-collection, delivery and transport charges, and any surcharge, are set independently by the Provider. The billing module aggregates them and, where applicable, adds a disclosed platform or convenience fee.

12.3 Refunds for cancelled appointments, undelivered medicines, cancelled memberships or disputed charges follow the Provider's cancellation and refund policy shown at booking, subject to Vaididea's published refund facilitation policy and any refund rights under the Consumer Protection Act, 2019. Failed or duplicate payments are refunded to the original payment source.

12.4 Vaididea may revise subscription fees to Providers on at least thirty (30) days' prospective notice, and fees to Patients on prior notice shown on the Platform. A change does not affect bookings already paid.

12.5 **Provider subscriptions.** Subscription and set-up fees are shown before purchase. Where a subscription renews automatically, Vaididea sends an invoice and a renewal reminder at least ten (10) days before renewal, and the Provider may cancel before the renewal date. Fees are exclusive of GST and other taxes unless stated. Each Provider is responsible for its own taxes and statutory filings.

12.6 **Late payment.** If a Provider's payment is overdue, Vaididea may charge interest at [rate] per cent per annum from the due date, and after notice may reduce credits, suspend, and finally discontinue the Provider's subscription services, but never in a way that stops access to patient records the Provider must keep (see clause 15.5).

12.7 Provider subscription fees and one-time set-up fees are non-refundable, except that if Vaididea suspends or ends a paid service for reasons other than the Provider's breach, the Provider is entitled to a pro-rata refund of the unused period. This clause does not limit any refund due because a paid service was not provided as promised, or any right the law gives that cannot be excluded.

12.8 **Billing records.** Vaididea's billing records are conclusive of the fees due unless a Provider shows a clear error by written notice within thirty (30) days of the invoice. This does not apply to Patient payments, which are governed by clause 12.3.

12.9 Free trials and pilots are provided as is. Data entered during a trial may be lost at its end unless the Provider upgrades or exports it before then.

12.10 **Invoices and taxes.** Vaididea issues a tax invoice for its own fees. A Provider issues its own invoice or receipt to the Patient for the Provider's charges and is responsible for the GST and other taxes on them.

12.11 **Clear pricing.** The total price a Patient must pay, including taxes and any platform or convenience fee, is shown before payment. Vaididea does not use misleading design, hidden charges or pre-selected add-ons to obtain payment or consent.

12.12 **Patient subscriptions.** A premium Patient feature renews automatically only if you have clearly agreed to that before paying. Vaididea reminds you before renewal and you can cancel as easily as you subscribed, with effect from the end of the paid period.

12.13 **Payment problems.** If a payment fails, is reversed or is disputed with your bank, Vaididea may pause the related booking or service until the matter is settled. Where money has been taken but a booking is not confirmed, it is refunded to the original payment source as clause 12.3 provides.

12.14 **Care packages and bundles.** A Provider may sell a care package, test bundle or recurring care plan (for example, a six-month plan for a long-term condition). What it includes, its price, how long it lasts and the rules for any unused part are set by the Provider and shown before purchase. If a Provider cannot deliver what a package promised, a refund of the unused part is due as clause 12.3 provides. A package does not promise any clinical result.

Article XIII. Disclaimer of Warranties

13.1 TO THE MAXIMUM EXTENT APPLICABLE LAW PERMITS, THE PLATFORM AND ALL SERVICES ARE PROVIDED "AS IS" AND "AS AVAILABLE", WITHOUT WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR STATUTORY, INCLUDING WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, ACCURACY, OR UNINTERRUPTED OR ERROR-FREE OPERATION. VAIDIDEA DOES NOT WARRANT THAT THE PLATFORM WILL BE AVAILABLE AT ALL TIMES, INCLUDING DURING NETWORK OUTAGE.

13.2 **Offline use.** Data created offline syncs when a connection returns, and Vaididea does not warrant that sync will be instant or error-free. Vaididea keeps sync conflict logs and takes reasonable steps to prevent data loss, and is not liable for delays caused by network conditions.

13.3 Nothing in this Article takes away rights you have under the Consumer Protection Act, 2019 or other mandatory law.

Article XIV. Limitation of Liability and Indemnity

Limitation of liability

14.1 TO THE MAXIMUM EXTENT PERMITTED BY LAW, VAIDIDEA IS NOT LIABLE FOR INDIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL OR PUNITIVE DAMAGES, OR FOR LOSS OF PROFIT, DATA OR GOODWILL, ARISING FROM: (i) THE CLINICAL ACT, OMISSION OR NEGLIGENCE OF ANY INDEPENDENT PROVIDER; (ii) DELAY, FAILURE OR UNAVAILABILITY OF EMERGENCY OR AMBULANCE DISPATCH; (iii) RELIANCE ON ANY AI FEATURE OUTPUT; (iv) THE ACT OR OMISSION OF ANY THIRD-PARTY INTEGRATION, PAYMENT GATEWAY OR INSURER; OR (v) BREACH OF THESE TERMS BY ANY USER.

14.2 WHERE A CLAIM ARISES FROM A SINGLE, IDENTIFIABLE TRANSACTION FACILITATED THROUGH THE PLATFORM, VAIDIDEA'S AGGREGATE LIABILITY FOR THAT CLAIM SHALL NOT EXCEED THE NET PLATFORM FEE ACTUALLY RETAINED BY VAIDIDEA FOR THAT TRANSACTION.

14.3 FOR ANY OTHER CLAIM, VAIDIDEA'S AGGREGATE LIABILITY ARISING OUT OF OR RELATING TO THE PLATFORM SHALL NOT EXCEED THE GREATER OF (i) THE PLATFORM FEES PAID BY THE AFFECTED USER TO VAIDIDEA IN THE TWELVE (12) MONTHS BEFORE THE CLAIM, OR (ii) RUPEES TEN THOUSAND (INR 10,000).

14.4 NOTHING IN THESE TERMS LIMITS LIABILITY THAT CANNOT BE EXCLUDED UNDER APPLICABLE LAW, INCLUDING LIABILITY FOR DEATH OR PERSONAL INJURY CAUSED BY VAIDIDEA'S OWN NEGLIGENCE OR A DEFECT IN ITS OWN SOFTWARE OR OPERATIONS, OR FOR VAIDIDEA'S OWN FRAUD, WILFUL MISCONDUCT OR GROSS NEGLIGENCE IN OPERATING THE PLATFORM, AS DISTINCT FROM THE CLINICAL CONDUCT OF INDEPENDENT PROVIDERS.

Indemnity

14.5 Each Provider shall indemnify, defend and hold harmless Vaididea and its directors, employees and affiliates against all claims, losses, damages, liabilities and expenses (including reasonable legal fees) arising from: (a) the Provider's breach of these Terms; (b) clinical negligence, malpractice, unsafe premises, equipment or transport, or regulatory non-compliance by the Provider; (c) inaccurate information submitted by the Provider; or (d) the Provider's violation of Applicable Law.

14.6 A Patient or other User is liable to indemnify Vaididea only for loss caused by that User's fraud, deliberate misuse of the Platform or unlawful acts, and not for honest errors or inaccurate information given in good faith.

Article XV. Suspension and Termination

15.1 Vaididea may suspend or terminate a User's or Provider's access on reasonable belief of fraud, credential falsification, misuse of Emergency Services, breach of these Terms, or risk to patient safety. Except where it would risk safety or the law forbids it, Vaididea gives notice with reasons and a chance to respond or appeal through the Grievance Officer. Vaididea may suspend access temporarily while it investigates a complaint or alleged breach.

15.2 Where possible, Vaididea helps complete or transfer ongoing care and gives the User access to their records.

15.3 A User may deactivate their account at any time through the Platform. Certain records may be kept as required by law, as set out in Article VII.

15.4 Provisions that by nature should continue after termination, including Articles VII (retention), X, XI (clauses 11.2 and 11.3), XIII, XIV, XVII and XVIII and any accrued rights, survive termination.

15.5 **Provider data exit.** On termination or expiry, a Provider may, on request within ninety (90) days, download its records and patient data it controls in a standard, machine-readable format (such as PDF, CSV or FHIR). The Provider's own duty to keep medical records continues. After that period, the data is deleted or anonymised under clause 7.11.

Article XVI. Force Majeure

16.1 Vaididea is not liable for failure or delay in performance caused by anything beyond its reasonable control, including natural disaster, pandemic, internet or telecommunications outage, power failure, governmental action or third-party infrastructure failure, including any resulting failure of real-time dispatch, offline sync or notification delivery. Vaididea will take reasonable steps to restore the Services.

Article XVII. Governing Law and Dispute Resolution

17.1 These Terms are governed by the laws of India. Subject to clause 17.3 and the arbitration agreement below, the courts at [City, State] have jurisdiction over disputes arising from or connected with these Terms.

17.2 A dispute is first referred to good-faith negotiation, to be concluded within thirty (30) days of written notice. If unresolved, a commercial dispute between Vaididea and a Provider is finally resolved by binding arbitration under the Arbitration and Conciliation Act, 1996, if practicable as fast-track arbitration under Section 29B, before a sole

arbitrator appointed by mutual agreement of the parties, seated at [City], in English. If the parties do not agree on the arbitrator within fifteen (15) days, the arbitrator is appointed under Section 11 of that Act or by [name of arbitral institution].

17.3 A Patient or other individual consumer may choose to refer a dispute with Vaididea to arbitration on the same terms, or to approach the District, State or National Consumer Disputes Redressal Commission (including the forum where they live or work, as the Consumer Protection Act, 2019 allows) or a civil court. Nothing in this Article takes away that statutory right or restricts any User's right to complain to the Data Protection Board of India under the DPDP Act.

Article XVIII. Grievance Redressal

18.1 In line with the Information Technology Act, 2000, the Intermediary Guidelines Rules, the Consumer Protection (E-Commerce) Rules, 2020 and the DPDP Act, Vaididea has appointed a Grievance Officer to handle complaints about the Platform and the processing of personal or Health Data, and publishes the same officer's contact details as the person who can answer Data Principals' questions about that processing. If Vaididea is notified as a Significant Data Fiduciary, it will also appoint a Data Protection Officer as the DPDP Act requires:

Grievance Officer and data-protection contact	[Name], [Designation]
Email	[grievance@vaididea.in]
Postal address	[Registered office address]
Response timeline	Acknowledgement within twenty-four (24) hours; resolution within fifteen (15) days (and within any longer period consumer law allows for e-commerce matters)

18.2 Complaint help in regional languages is available through the Application or a Sahayak.

Article XIX. General Provisions

Amendment

19.1 Vaididea may amend these Terms for changes in law, features or business practice. A material change is notified through the Platform or to the User's registered email or phone at least fifteen (15) days before it takes effect. A change that widens how Health Data is used needs your fresh consent. If you disagree, you may stop using the Services and ask for deletion of your data and a pro-rata refund of prepaid, unused fees. Continued use after the effective date means acceptance of other changes.

Severability, waiver, assignment

19.2 If a provision is held invalid or unenforceable by a competent court or tribunal, it is modified to the minimum extent needed to make it enforceable and the rest continues in force.

19.3 Failure by Vaididea to enforce any right is not a waiver of that right.

19.4 Vaididea may assign these Terms in connection with a merger, acquisition or sale of assets. No User or Provider may assign its rights or duties without Vaididea's prior written consent.

Entire agreement, notices, accessibility

19.5 This Agreement is the entire agreement between the parties on its subject and replaces all earlier agreements and understandings, written or oral.

19.6 A notice to Vaididea must be in writing and sent to the Grievance Officer's address in Article XVIII. A notice to a User or Provider may be sent to the email address, phone number or in-app notification linked to their account.

19.7 Vaididea aims to make the Platform usable by persons with disabilities and welcomes accessibility feedback through the Grievance Officer.

19.8 **Order of precedence.** The main body of these Terms prevails over Schedule A, and Schedule A prevails over the Privacy Policy, except that where Schedule A gives a more specific rule for a module, that rule governs for that module only. Nothing in these Terms, Schedule A or the Privacy Policy reduces a right you have under the DPDP Act or any other Applicable Law, and no disclaimer in these Terms overrides a mandatory legal obligation of Vaididea. Where the Privacy Policy gives you greater protection for your personal data than these Terms, the Privacy Policy prevails on that point.

19.9 **Electronic records.** To the extent the law permits, Vaididea's electronic records of consent, access logs, transactions and notices are admissible as evidence of their contents, including under the Bharatiya Sakshya Adhiniyam, 2023.

19.10 **Business transfer.** If Vaididea is merged, acquired or sells assets, user data passes to the successor only on terms that protect it at least as well as these Terms and the Privacy Policy, and you will be told.

19.11 **Relationship.** Nothing in these Terms makes any User or Provider a partner, agent or employee of Vaididea. No third party has rights under these Terms, except those entitled to indemnity under Article XIV.

19.12 **Language of support.** On request, Vaididea will explain these Terms in a supported regional language through the Platform or a Sahayak.

19.13 **Change in law.** Vaididea may modify, suspend or withdraw any feature to comply with Applicable Law or a regulatory direction, with notice where practicable. Vaididea is not liable for doing so, but prepaid fees for a feature withdrawn for this reason are refunded pro rata.

19.14 **Contact.** Questions about these Terms may be sent to the Grievance Officer at the address in Article XVIII.

19.15 **Earlier versions.** Vaididea keeps earlier versions of these Terms and gives you a copy of the version that applied to you on request.

Schedule A. Operational Module Terms

These clauses apply to every Hospital, Clinic, Doctor and other Provider using the matching module, in addition to Article V and the intermediary position in Article IV. New module clauses may be added on notice under Article XIX. Each module starts to apply only from its go-live date.

A.1 Appointment Booking and Scheduling

- The Platform provides real-time slot booking, rescheduling and reminder tools. Availability shown is only as accurate as the calendar data the Provider enters, and the Provider must keep its availability, leave and holiday calendars current.
- A confirmed booking creates an appointment directly between Patient and Provider. Vaididea is not a party to it and assumes no liability for the Provider’s attendance, punctuality or quality of consultation.
- No-show, late-cancellation and rescheduling policy and any fee are set by the Provider and shown at booking.

A.2 OPD Queue and Token Management

- Token numbers, estimated wait times and “next patient” notices come from data entered by Provider staff and are indicative only. Vaididea does not guarantee exact wait times.

- The Provider remains responsible for calling patients in the right clinical order, including medically necessary reprioritisation, even where that differs from the token sequence shown.

A.3 Bed Management and Occupancy

- Bed availability is self-reported by the Hospital in real time. Vaididea is not responsible if a Patient cannot get a bed shown as available because the Hospital was slow to update it.
- Room and bed tariffs are those configured by the Hospital. The Platform only aggregates them day by day and does not set clinical or pricing policy.

A.4 Emergency, Triage and Ambulance Dispatch

- This module is also governed by the Emergency Services Disclaimer in clause 5.19 and clauses 5.20 to 5.28C. Triage colour-coding reflects the assessment of the attending Provider's staff at intake and is a clinical judgment for which the Provider is responsible.
- Live ambulance tracking depends on the operator's device GPS and network and may be delayed or unavailable for reasons outside Vaididea's control.

A.5 Admission, Inpatient Care and Discharge

- Admission forms, ward or ICU transfer records, daily rounds notes and discharge summaries are written by the Provider's clinical staff using the Platform as a record-keeping tool. Vaididea does not review, edit or clinically validate them and is not responsible for their medical accuracy or completeness.
- Where the Platform apportions bed charges across a stay using ward-transfer timestamps entered by staff, Vaididea is responsible only for the correctness of that computation, not for the clinical decision to transfer the Patient.

A.6 Nursing Records and Medication Administration

- Medication schedules, administration logs and vitals entries are made by the Provider's nursing staff. Automated abnormal-vitals alerts are a workflow aid based on Provider-set thresholds and do not replace continuous clinical supervision.
- The Provider remains responsible for medication accuracy, dosage safety and timely clinical escalation, whether or not an alert was generated.

A.7 Operation Theatre Scheduling and Checklists

- OT booking, team coordination and digital surgical-safety checklists support the Provider's own surgical safety protocol and do not replace the operating team's independent verification.
- Sterilisation-batch and instrument-count logs are kept by Provider staff. The Platform provides the record-keeping interface only.

A.8 Laboratory and Diagnostic Reporting

- Sample-tracking codes, result entry and sign-off by a qualified pathologist or radiologist happen within the Platform but are done only by the Diagnostic Centre's qualified personnel. A report is not valid or final until signed off. Barcode vial labels, analyzer or LIS machine interfaces and sample tracking are tools, and the Diagnostic Centre remains responsible for checking machine-generated results before sign-off.
- Critical-value alerts come from Provider-set thresholds and are a notification aid only. Direct communication of critical results to the treating clinician remains the Diagnostic Centre's responsibility.

A.9 In-House Pharmacy and Medicine Dispatch

- Stock, batch and expiry tracking (including first-expiry-first-out) and ward-dispatch tracking are inventory tools. Prescription verification and dispensing accuracy remain the licensed pharmacist's statutory responsibility under Article V.
- Charges for dispensed medicine, and reversals for returned or unused stock, are computed strictly from quantities entered by pharmacy staff.

A.10 Billing and Insurance Aggregation

- The Platform aggregates charges entered across modules into one bill. Vaididea is responsible for the arithmetic correctness of that aggregation based on Provider-entered line items, and not for the appropriateness, legality or amount of any charge, which remains the Provider's responsibility.
- Insurance eligibility and cashless status depend on data from the insurer or third-party administrator integration and are indicative only. Final claim decisions rest with the insurer or scheme administrator.

A.11 Inter-Facility Referral

- A digital referral transfers a copy of the Patient's relevant record to the receiving facility only with the Patient's consent, or a documented emergency override, and the receiving facility's acceptance. Both Providers remain independently responsible for

continuity and quality of care. Vaididea's role is secure transmission of the referred record set.

- Vaididea is not responsible for a receiving facility's refusal or delay in accepting a referral, including for want of beds, specialists or equipment.

A.12 Feedback, Ratings and Quality Alerts

- Post-visit feedback and ratings are submitted by Patients and shown as received. Vaididea does not verify individual feedback but acts on credible safety complaints under the grievance process in Article XVIII.
- Internal incident logs recorded by Provider staff for quality improvement are the Provider's own clinical-governance record. Vaididea provides the logging interface and does not decide clinical fault.

A.13 Ambulance Application

- Operators and drivers are independent. They are responsible for vehicle, crew, equipment, documents, fares, patient care and transport, under clauses 5.20 to 5.28.
- Vaididea is responsible for the dispatch and tracking tools as designed (without any response-time guarantee) and for safe handling of operator data under Article VII and the Privacy Policy.

A.14 Wellness, Gym and Fitness Studios

- The Provider is responsible for facility safety, trainer quality, programme suitability, membership terms and the claims it makes, under clauses 5.38 to 5.46.
- Vaididea is responsible for the listing, booking and payment tools and for data handling under Article VII.

A.15 Sahayak and Assisted Access

- The Sahayak is responsible for explaining actions in the Patient's language, using only the access the Patient grants, and not keeping or sharing Health Data, under clauses 5.47 to 5.50.
- Vaididea is responsible for recording consent given by assisted, voice or other supported methods and for session controls on shared devices.

A.16 Teleconsultation and E-Prescription

- The RMP alone decides whether a consultation can be done remotely and what is prescribed, under clauses 5.9 to 5.12. Video or audio quality, connectivity and device problems may interrupt a consultation and Vaididea does not guarantee uninterrupted

calls.

- Prescriptions are issued and signed by the RMP. Vaididea is responsible only for delivering them securely to the Patient and any chosen Pharmacy.

A.17 Blood Bank and Donor Matching

- Stock and donor data are self-reported and indicative. Screening, testing and transfusion remain the Blood Bank's or Hospital's responsibility, under clauses 5.29 to 5.31.
- Vaididea facilitates contact only and facilitates no payment or trade in blood.

A.18 Fertility and Women's Health

- The treating clinic is responsible for all treatment and decisions, and for compliance with the ART, Surrogacy, PC-PNDT and MTP laws, under clauses 5.32, 5.33, 5.53 and 5.54.
- Vaididea provides record-keeping, scheduling and tracking tools, with enhanced consent and access controls for reproductive Health Data.

A.19 Home Care, Nursing and Elder Care

- The agency or professional is responsible for staff checks, care quality and incidents at the User's home, under clause 5.34.
- Vaididea provides booking and communication tools, and is liable only as clause 14.4 provides.

A.20 Delivery and Sample Collection

- Healthcare Agents act for the assigning Provider or under a separate agreement, under clauses 5.73 to 5.78.
- Vaididea is responsible for the assignment, tracking and status tools as designed and for data handling under Article VII. It is not responsible for the conduct of a Healthcare Agent or for the timing of a visit or delivery.

A.21 Emergency Detection and Hospital Fleets

- Automatic crash detection and a Hospital's own ambulance fleet are governed by clauses 5.28A to 5.28C.
- Vaididea is responsible for the detection and dispatch tools as designed (without any guarantee of detection or response time) and for data handling under Article VII.

A.22 Billing Controls and Payouts

- Payment-linked report release, discharge clearance, bill splits, payouts and Provider-set rate lists are governed by clauses 5.62A to 5.62C.
- Vaididea is responsible for computing bills and splits correctly from Provider-entered inputs, as A.10 provides.

This Schedule A is part of the Terms and Conditions. Conflicts between this Schedule and the main body are resolved under clause 19.8.

Acceptance

BY CLICKING “I AGREE”, COMPLETING REGISTRATION, OR USING THE PLATFORM AFTER NOTICE OF THESE TERMS, THE USER ACKNOWLEDGES THAT THEY HAVE READ AND UNDERSTOOD THESE TERMS AND CONDITIONS AND AGREES TO BE BOUND BY THEM. THE USER MAY ASK FOR THESE TERMS IN A SUPPORTED REGIONAL LANGUAGE AT ANY TIME THROUGH THE PLATFORM OR A SAHAYAK.
